

About RotopaX

Who are we?

RotopaX (patent pending) are proudly made in the USA by the original manufacturer of the 1st generation fuel and water packs. RotopaX are Rotational Molded - the process which produces indisputably superior products.

What are the benefits of rotational molding?

Our roto-molded products have distinct advantages over any blow-molded containers on the market today. Blow-molded products, such as cheap “gas cans,” are less expensive to produce, but they tend to color fade, are less durable, and may be prone to additional defects such as leaking. RotopaX, on the other hand, provide the following benefits:

- Durable: thicker walls and stronger construction helps RotopaX work as hard as you do
- Colorfast: bright colors that are less prone to fading ensure the longest-lasting fuel containers you’ll ever own
- Leak-Proof: extra threads, thicker walls, and a sure-seal gasket guarantee your spout wont leak or vibrate loose
-

Why are RotopaX superior?

It should be obvious by now, but here are more reasons why you know you want RotopaX. And don’t forget, we also offer a full-size, 4-Gallon gasoline pack - just like we’ve always made but with our new design improvements.

Customizable Flexibility

RotopaX is an exclusive, modular system that allows you to customize 2 Gallon packs according to your varying needs. It takes only seconds to switch between:

- Gasoline
- Water
- Diesel
- Kerosene
- 2-Cycle
- Emergency Packs
- First Aid Packs
- Utility Packs

Unlimited Uses

The wide array of products and the flexibility of the RotopaX system opens additional applications beyond ATV/UTV such as:

- Gasoline
- 2-Cycle
- Water
- Emergency Packs
- First Aid Packs

- Kerosene
- Utility Packs
- RV
- Workshop/Factory
- Marine
- Landscape Maintenance
- Home/Farm/Ranch
- And much, much more...

Effortless Mounting

RotopaX utilize widely-available mounting brackets which make mounting and storing your RotopaX even easier. And remember that our packs can be used separately as well. What about the future?

As your requirements change from day-to-day, RotopaX is the only system that gives you the freedom to mix and match your packs at will. If you need a different pack in the future, you can easily merge it into your existing RotopaX system. Now that's innovation!
